The following towns have reported the following number of annual members to the American National Red Cross up to Thursday evening: Logan, 2900; Clarkston, 200; Provi-

dence, 59; Mendon, 112; Wellsville, 156; Cornish, 65; Richmond, 302; Hyrum, 282; Benson, 26; and Petersboro, 49. Petersboro and Cornish have done exceptionally well as they have practically a membership for nearly inhabitant in their precincts. The quota for Cache county is 7250 members and only 4161 have been secured up to Thursday evening. Some of the towns will have to hurry up. Logan's quota was reached before the campaign opened which shows again the value of the War Chest. Practically 2900 people were made members of the Red Cross through the War Chest. Smithfield, Millville, Paradise, Cove, Hyde Park and others, hurry up your reports.

The new rail which has been erected in the center of the steps leading to the main entrance of the Federal building, adds beauty to the place as well as making it better for the old folks to go for their mail during the winter months.

Victor Hallett, who has for the past two years been laboring in the mission field, returned to his home here Wednesday. Mr. Linblad has been serving as president of the Wisconsin conference.

Eugene Stewart returned home on Wednesday evening from Camp Zachary Taylor, Ky. Mr. Stewart says a number of Logan boys who trained at the U. of U. in Salt Lake and were later transferred to Camp Taylor will be here within a few days.

The Presidency of this stake desires to announce that Sunday, December 22, is set apart as a day of fasting and prayer by all members of the Church for the arrest and speedy suppression by Divine Power of the devastating scourge which is still passing over the earth.

It seems that "influenza" has been beaten at its own game, as the report made yesterday by the board of health showed that only seven cases existed in five quarantined homes. The chart on the front page of this paper shows that the masks have been very beneficial in preserving the lives of our citizens as well as stamping out the epidemic in Logan.

The S. A. T. C. boys were a happy bunch yesterday. They were as happy as a little boy with a pair of new boots, being given their freedom and allowed to visit the business section of the city between the hours of 3 p. m. and 9 p. m. yesterday. Today the demobilization will start at the college in earnest.

Are you a Good Fellow? If not, join now and make a family of children happy for Christmas. Send your name in to this office.

A Soldier's Employment committee representing the City, Commercial Club, and City Council of Defense has been appointed to seek employment for the returning soldiers. This committee consists of Mr. A. E. Anderson, chairman; George B. Bo-

wen and George Dunbar. After the holidays any soldier desiring work should call at the office of the Commercial club and the committee will use its best efforts to find him employment. A list of all the soldiers who desire work will be kept as well as a list of all the business houses, manufactures, garages, etc., which might be able to use a extra man for a short time. The committee has in mind a number of things to keep returned soldiers busy during the winter months and until the spring work opens up.

Mr. R. L. Allen of Coveville has purchased the herd of cattle owned by Mr. H. P. Barber. These cattle are at Howell, Utah and there is no better cattle anywhere in the country.

Be in on the Good Fellow movement. Send your name to Mrs. John T. Caine or to this office and say that you will leave a Christmas package at one of Logan's homes of expectant children.

Heber L. Maughan, one of the prominent citizens of Wellsville, came over to Logan as soon as the quarantine was lifted in Wellsville yesterday. He has just recovered from an attack of influenza and has the same hard feelings toward it that all those have come under its influence.

BOYS AT U. A. C. BEING MUSTERED OUT

(Continued from Page One)

venereal diseases and but eight men in any way incapacitated. In practically every case the men are being returned to civil life in improved physical condition, with gains in weight running from three to twenty pounds.

The Students' Army Training Corps was established at the Utah Agricultural College on September 30, when similar organizations were installed in several hundred institutions. At that time the four hundred and fifty-three members of the National Army Training Detachment who were being trained at the college became the vocational section of the S. A. T. C. During the time the S. A. T. C. was in operation at the institution two hundred and thirty-three men were inducted into the collegiate section, four hundred and sixty-seven into the telephone electrician work, and three hundred and sixty-one into the vocational section making the total number inducted, six hundred and eightyone; of this

number fifty-nine were sent to officers training camps to prepare for commissions. The collegiate men received, aside from military training, academic instruction in War Times, Military Law, Personnel work, Military Hygiene, Military French, Bacteriology, Mapping and for those in the quartermaster's course, training in commerce and business. The vocational men were trained as machinists, blacksmiths, wagoners, auto mechanics, radio operators or topographical draughtsmen. All received a course in War Aims.

The college was able, through the most complete cooperation of military and school authorities, to provide adequate barracks and mess accommodations for the men. The new livestock building was turned over to the battalion to serve for barracks, the other companies were placed in the Thomas Smart gymnasium and in the college chapel. The south wing of the main building, which was to have been used for barracks was used as a hospital during the influenza epidemic.

The influenza made its appearance at the College about October 16. A large and completely equipped hospital was organized at once and was in operation by October 18 under the direction of Dr. D. C. Budge. The hospital was in use for four weeks, by which time the influenza was completely stamped out of the institution. During the four weeks, 244 cases of influenza or suspected influenza were cared for. Of this number six died, making a death rate of one-fourth of one per cent. Five physicians were in constant attendance, with two graduate nurses and ten attendants. Three physicians were employed to care for the men in the barracks outside of the hospital.

Cooking for the ailing men was done under the direction of the School of Home Economics by former students of the institution.

Of the six hundred and forty-three men at the college at the time of demobilization, all but seventeen had taken out government insurance and all had been urged to insure. Insurance was written to the amount of \$5,890,560, for the men, and of \$210,000 for the officers.

At the time of demobilization, the S. A. T. C. was organized and officered as follows:

Captain Stephen Abbot, U. S. A., retired, commandant; Captain Henry Moyle, 31st Infantry, U. S. A., executive officer; First Lieut. H. C. Force, adjutant; First Lieut. W. E. Finch, chief tactical officer; First Lieut. T. H. Holcombe, in command of Company A; and Second Lieutenants T. E. Leaver, in command of Company B; George E. Waring in command of Company C; Glen L. Miller, post exchange officer; Clyde Roney, attached to Company D; Fred A. Finch, in command of Company C; James M. Christenson, morale officer; Gathin T. Fowler, attached to Company C; George B. Hendricks, personnel officer; M. L. Harris, assistant personnel officer; L. M. Chipman, attached to Company A; James E. Watkins, assistant adjutant; George C. Siggar, attached to Company D; and James N. Fulliam, attached to Company C.

ST. JOHN'S CHURCH

Church service at St. John's Church on Sunday at 11 a. m. No Sunday School.
Rev. E. T. LEWIS, Rector

TAKES OF DANDRUFF, HAIR STOPS FALLING

Save your Hair! Get a small bottle of Dandruff right now—Also stops itching scalp.

This, brittle, colorless and scraggy hair is mute evidence of a neglected scalp; of dandruff—that awful scourge. There is nothing so destructive to the hair as dandruff. It robs the hair of its lustre, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die—then the hair falls out fast. A little Dandruff tonight—now—any time—will surely save your hair.

Get a small bottle of Knowlton's Dandruff from any drug store. You surely can have beautiful hair and lots of it. A little Dandruff tonight—now—any time—will surely save your hair.

MAKE THE OLD APPLE TREE NEW

(Continued from Page One)

Fire blight and leaf diseases, too, are therefore carried over winter. Thus an abandoned unsprayed and unpruned orchard becomes a menace to the whole neighborhood. Removal of the trees or renovation by cutting back and building or grafting becomes necessary in the name of healthful orcharding."

RED CROSS RE-ORGANIZATION

(Continued from Page One)

a new chairman, and the Refugee garment committee will be a combination of the former hospital garment and refugee garment committees, also with a new chairman. A new committee on distribution will be created to handle the materials.

The entire production work is under the direction of Miss Margaret Wilkinson who is now chairman of the Supplies committee, and Mrs. A. Atkinson is vice chairman.

In making this necessary reorganization, the Executive hopes that it will be distinctly understood that there is no reflection or criticism of any of the former committees or their heads. The utmost efficiency has been achieved in the past and we are extremely grateful to the faithful committees which attained it. The new changes are due entirely to the need of meeting new conditions.

NEGRO AGENTS ASSIST FOOD PRODUCTION

One hundred and forty two negro men agents and 194 negro wo-

men agents of the United States Department of Agriculture and the State Agricultural Colleges, were at work in the Southern States during the fiscal year ending June 30, 1918. These agents were very successful in stimulating the growing of more food crops, giving special attention to home gardens and the canning and drying of fruits and vegetables for home use. They also materially assisted in helping in the labor problem by urging negroes on farms to work six days in the week.

AGENT ARMY WORKS FOR BETTER SEED CORN

Realizing the importance of good seed corn as an essential in increasing production, and knowing that fall selected seed corn is best, county agents have directed considerable effort in seed corn selection and testing campaigns. Three hundred and fifty four agents assisted 63,813 farmers last year in the 33 Northern and Western states in fall selecting seed corn and more than a million additional acres were plated with fall selected seed corn resulting from work of the agents during the previous fall. Assistance was given to 36,538 farmers in the testing of seed corn, resulting in 946,563 additional acres being planted with tested corn. The agents conducted extension campaigns to encourage seed corn selection in the fall and seed corn testing in Illinois, Indiana, Iowa, Michigan and Pennsylvania.

Invention of Printing.
He who first shortened the labor of copying by device of movable types was disbanding hired armies and cashing most king and senate and creating a whole new democratic world; he had invented the art of printing—Life of Frederick the Great.
